### MGT 103

Product Marketing and Management: Defining markets for products and services, segmenting these markets, and targeting critical customers within segments. Strategies to position products and services within segments. The critical role of pricing as well as market research, product management, promotion, selling, and customer support. Design a 10 page marketing plan with a team for a fictional company and product.

### VIS 41

Design Communication: This course provides a strong foundation in contemporary techniques of design communication, introduced in light of their significance to visual culture and the speculative design field. We cover digital image editing, typography, vector-based illustration and diagramming, and document lay out. Also introduced are basic digital video editing tools and web production formats. Emphasis is on mastery of craft through iteration and presentation of multiple projects.
